

PRECISION QUINCY

Railroad Shelters

Railroad/Transit

With finished and insulated interiors, Precision Quincy Industries' Railroad Shelters are built for durability for years to come. The gable roof design with passive ventilation creates an attractive profile that also prevents interior condensation. Shelters are available in polyurethane paint or powder coat finish to resist corrosion and provide a graffiti resistant exterior. The 3 pt. heavy-duty lock set with padlock handles is vandal-resistant and easy to operate.

The Railroad Shelters are built to last for heavy duty use. Shelters are constructed of welded 12-gauge galvanized steel or .100 aluminum as well as stainless steel hinges with grease fittings to prevent doors from sticking. The full contact door gasket provides a dust-proof and water-resistant compression seal to keep out contaminants. For easy adjustable equipment mounting options, our shelters feature vertical keyslot ribs 24" O.C.

Details

Construction:

Formed Panel. 12 gauge Galvanized Steel or .100 Aluminum Corrosion-Resistant Metal

Doors: Pan-in-Pan (Double pan) Construction, Sturdy, Secure, Replaceable

- Single - 30", 36", or 42" widths X 78" ht.
- Double - 48" or 60" widths X 78" ht.
- Custom Sizes and Configurations Available

Finish:

Range of Neutral Colors to Blend-in with Surroundings

Exterior:

Smooth-Flat Surface for Mounting Equipment

Insulation:

Floor, Walls, Roof: R-13 Standard
Fiberglass for Foamboard (Higher R-values Available)

Floor:

Metal

Walls & Ceiling:

White Textured Facer ASTM-E84 Class
"C" (Class "A" Available)
